

THE PRESIDENT

## Letter of Appointment

It is with great pleasure that I herewith appoint

**Ms. Esther Asare**

Master-Student at *the University of Cape Coast in Ghana* as **mentee** within the

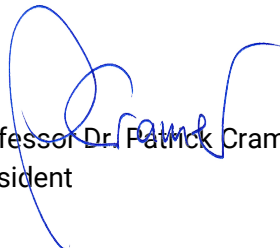

**ARTEMIS** (African Research Talents Experiencing Mentorship in Science) programme.

Ms. Esther Asare is mentored by Dr. Candice Frances from the Max Planck Institute for Psycholinguistics from January until December 2023 to questions related to research and the scientific career of Ms. Asare. She is receiving advice and guidance on how to continue her studies, how to apply for scientific positions, how to prepare project proposals, and she gained international experience through a visit to the Max Planck Institute. The aim of this programme is to provide important support to Ms. Asare on her way to become one of the next generation of researchers, leaders and professionals in African countries.

In a kick-off workshop about mentoring and post-colonial structures in science, Ms. Asare and her mentor were introduced to the mentoring process and sensitized to avoid paternalistic balance of power. In the course of the mentoring year, Ms. Asare visited the Max Planck Institute for Psycholinguistics and was supervised by Dr. Frances.

Munich, September 2023

  
Professor Dr. Patrick Cramer  
President
