Correction for 'Iron-doping-enhanced photoelectrochemical water splitting performance of nanostructured WO<sub>3</sub>: a combined experimental and theoretical study' by Teng Zhang *et al.*, *Nanoscale*, 2015, 7, 2933–2940.

The authors would like to make the following amendments to their published article:

(a) On page 2937, in the right-hand column, the term “*versus* Ag/AgCl” in the sentence beginning “The calculated...” should read “*versus* RHE”.

(b) On page 2937, Fig. 6 in the paper should be replaced with the figure below.

**Fig. 6** (a) Mott–Schottky plots of the undoped WO<sub>3</sub> and 2% Fe-doped WO<sub>3</sub> (inset) from electrochemical impedance data measured at 5 kHz in the dark. (b) Mott–Schottky plots for the undoped WO<sub>3</sub> and 5% Fe-doped WO<sub>3</sub> measured at 5 kHz in the dark.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
